Preparing Gelbee Ammo

Before loading Gelbee ammo, follow these steps:

1. Pour ammo into a container and add enough water to cover ammo completely. The minimum correct ratio is 8 ounces of water per each ½ teaspoon of ammo. Failing to add enough water will result in improperly expanded ammo that will not function properly and may cause jams and lower velocity.
2. Let ammo soak in water for four hours.
3. Drain all excess water.
4. To keep your Gelbee BBs hydrated long term, add water to your ammo container as needed.

Removing the Battery

1. Make sure the Stinger gel BB blaster is turned OFF and pointed in a SAFE DIRECTION.
2. Unscrew battery door using a screwdriver (not included)
3. Open the battery door on the bottom of the handle.
4. Disconnect the battery from the attached connector.
5. Close the battery cover and replace screw.

Installing the Battery

1. Make sure the gel BB blaster is turned OFF and pointed in a SAFE DIRECTION.
2. Unscrew battery door using a screwdriver (not included).
3. Open the battery door on the bottom of the handle.
4. Pull the battery connector out from the inside of the handle.
5. Connect the battery to the connector.
6. Slide battery and connector back into the handle.
7. Close the battery cover and replace screw.

Charging the Battery

1. Plug the connector on the battery into the connector on the battery charger.
2. Plug the charger into a standard 110-volt outlet.

IMPORTANT: Charge the battery a MINIMUM of 4 hours and a MAXIMUM of 6 hours prior to initial use. This gel BB blaster will not operate properly without a fully charged battery.

CAUTION: To reduce the risk of fire and/or damage to your battery, do not overcharge the battery. Unplug the battery charger when not in use. Use only the charger supplied with your Stinger gel BB blaster. Use caution when handling and using the battery or charger to prevent risk of electric shock.
